

# Legacy Boats PROFISH 30

The PROFISH 30 represents a new approach to sports fishing boat design. Guided by the knowledge of experienced sports fishermen, the PROFISH 30's unique layout creates a practical, roomy and rugged craft designed to survey standard and built to withstand the harshest Australian conditions. Powered by a choice of Yanmar Marine diesels (single or twin installation) the PROFISH 30 is fast yet economical to run.

Construction is of fibreglass, the hull, deck and Sports Bridge are reinforced by high density foam core material and additional hull strength is gained from heavy duty longitudinal stringer construction. The high gloss, gel coat exterior makes this boat easy to clean after a successful day's fishing. Salt water pumps are fitted for deck hose down.

## Specifications
